## India programme achieves amazing results

Last year we wrote about plans to scale up the programme in India with a one-year project with Goodwill Social Work Centre(GSWC) in Madurai. Lessons have been shown to villages, schools, social workers, NGOs, corporates and Health teams in Madurai and the surrounding five districts. Clive Dove-Dixon, our associate involved with the project, travelled to Madurai at the start of the year to see how it has progressed.

Goodwill Social Work Centre have set up their own DVD duplication lab in Madurai so that they can quickly produce DVDs for the many partners they are working with. We hope to investigate how this could be used to have an impact on our wider work in the future. In addition, they have established a link with the Ministry of Health locally, and 72 sets of DVDs have been provided (that's over 2300 individual DVDs) for use in health centres. The initial reports (subject to confirmation but we believe they can be trusted) suggest that over one million lesson viewings have happened as a result of this year-long programme!

### And finally....
